dac6pro, your solution to achieve maximal DAC6 compliance

dac6pro

The DAC6 reporting software your team actually wants to use

Becoming DAC6 compliant doesn't need to be a headache. DAC6pro is an intuitive and simple solution that brings you DAC6 compliance as quickly as possible. We focus on making compliance easy with a complete process that starts with onboarding in the tool, so you and your stakeholders will be ready to go.

foreword
DAC6 is here to force more transparency and fairness in taxation

It is mandatory for intermediaries and taxpayers to report and provide audit trail information on their (cross-border) arrangements to the tax authorities of the relevant countries. The aim of this measure is to highlight potential loopholes and harmful tax practices, and it is seen as one of the biggest changes for both tax professionals and taxpayers in recent years.

How will DAC6 impact the tax professional? The truth is that intermediaries will be faced with even more menial administration tasks. Becoming DAC6 compliant is time-consuming and if done manually it can lead to costly human errors. DAC6pro is a tool conceived by our unique combination of IT / Tax professionals and our DAC6 community, to help intermediaries and multinationals easily comply with the DAC6 regulations.

Hank Moonen

CEO & Founder

intro
We make things easier for tax professionals

We translate international tax insights into software that we call solutions. But what makes us special and puts us in a unique position in the tax technology world is our team.

Our IT geniuses work together with our hipster designers, suit and tie tax professionals, and coffee-loving sales and marketing staff in an office on one floor with no walls. We like to call it concentrated creative mayhem. And boy, does it work. This setup allows for an environment that encourages variety and inspires transparency, and this has been key to building our one-of-a-kind TaxSuite.

taxsuite, making tax transparent

We are working towards having a full suite of affordable standardised software solutions for international tax professionals. Solutions that reconstruct the tax concept to make it transparent. How? By showing that tax mechanics are actually very similar globally and by providing in-house tax support through coaching and by training people to become experts. We continuously focus on increasing business intelligence and transparency by ensuring our technology is beautifully designed, simple to use, and user-friendly.

about TaxModel

dac6pro

DAC6pro in a nutshell

DAC6pro allows you to know exactly when you are and aren't DAC6/MDR compliant on a country-by-country basis in one simple to use solution. Fortify your compliance strategy by embedding DAC6pro in your daily work-streams to avoid unnecessary and material penalties.

With DAC6pro you'll be able to set-up arrangements; manage user rights to support different roles and responsibilities; collect data regarding arrangements including local regulations, taxpayers or intermediaries involved, and the value of the arrangement; and even more.

The DAC6pro approach can be defined in 4 steps:

Client management
So you can handle all the arrangements of all your clients.

Arrangement management
Gives you insight to all the arrangements per clients and helps you gather all the data that you need.

Hallmark test
To check which hallmarks are applicable to the arrangements for the countries that are involved.

Reporting
So you can easily report you arrangements to the different country authorities.

dac6pro

happy path
Discover the complete approach from A to Z

As with any new legislation, there is a learning period. In this case, it contains deadlines and specific data requirements. Missing any of these can lead to hefty fines and/or damage to a company's reputation. That's why it's important to get up-to-speed quickly.

For this reason, we've designed a smooth, happy path to becoming DAC6 compliant by helping you to administer, and if required, issue reports in the relevant EU countries correctly. We want our users to fully understand exactly how to use DAC6pro. Perhaps more importantly, we want to demonstrate why DAC6pro is a necessity if you need to be DAC6 compliant (spoiler alert: every business has to be DAC6 compliant).

One platform for all your DAC6 needs

DAC6pro is an end-to-end cloud solution designed to support your DAC6 compliance process. It allows you to identify, gather, and assess your arrangement data and to create reports in line with the receiving authority's technical requirements. Whether you have a single client or multiple clients, with DAC6pro your team will be in the driver's seat of your DAC6 compliance process, with the following features:
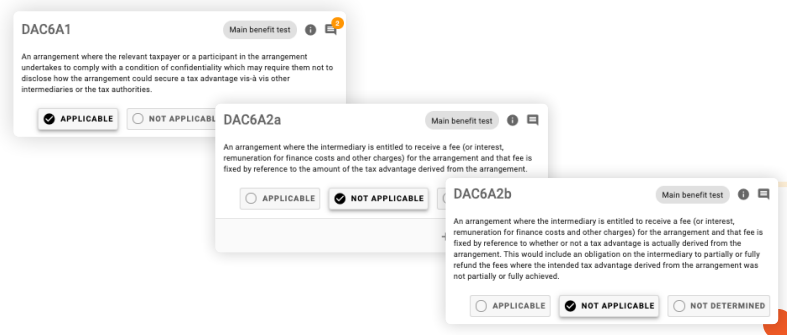

Report each EU member state* in XML

After the reviewer signs-off and the critical stakeholders have agreed on the report, the reporting officer can file the arrangements in an XML format in the EU member state*. Completion of the arrangements in DAC6pro automatically ensures 100% alignment with the technical guidelines of a particular country. You can also exchange the report with the stakeholders involved as a PDF or Microsoft Word document.

We are still awaiting the technical guidelines from some EU member states (click here for an up-to-date overview). Keep in mind that you can already start assessing and audit trailing your cross-border arrangements in DAC6pro. Once the tool is in line with the new XML schema and you re-select the Disclosing Country, the system will automatically update you on the missing gaps in your assessment. In this way, you will be prepared to convert the arrangements in the XML when it is ready.

## Integrated Smart Knowledgebase

Our integrated knowledgebase provides information on all types of national implementation. Instead of being overwhelmed by 28 different hallmark interpretations, our knowledgebase will only show you those of the relevant countries, to help you swiftly complete your assessment.

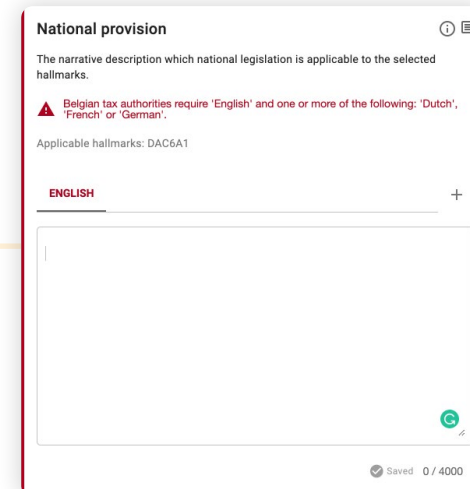

Hallmark assessments

Determine the hallmarks applicable to your arrangements based on its specific characteristics. Gain confidence in your decision-making process by using knowledge-based functionalities.

Be complete

DAC6pro will enforce you to include all relevant data by the built-in warning system.

dac6pro

Hassle-Free Compliance

DAC6pro eliminates the challenges one faces when analyzing, assessing, and reporting an arrangement. Support is provided to the user at each stage, with the right know-how and in a guided and funneled way.

Meet TaxSuite

TaxModel not only has a DAC6 solution – we have a wide-ranging suite of direct tax software solutions available. With our inhouse IT, tax, and market knowledge, we are in the unique position to effortlessly combine all the related disciplines and make complex problems as simple as they can be. For example, we can build APIs, among many other services.

DAC6enforcer
How do you collectively enforce DAC6 compliance?

Upgrade your DAC6 compliance process with the DAC6enforcer.

At TaxModel, we have been thinking about almost all the features that can help improve your DAC6 compliance journey. This is the reason why all our clients love the DAC6pro solution. However, a number of companies have asked whether we could add features to help them anchor, enforce, and monitor the actual compliance behavior of their employees.
