

DATA COLLECTION SOFTWARE SOLUTION

TAXMODEL

Background and introduction

TPquestionnaire is a software solution that can be used for multiple purposes, e.g. processing transfer pricing interviews or gathering data for year-end reporting and due diligence data requests.

Easy Data Collection

Audit Trailing

Organising and storing of
all relevant tax data

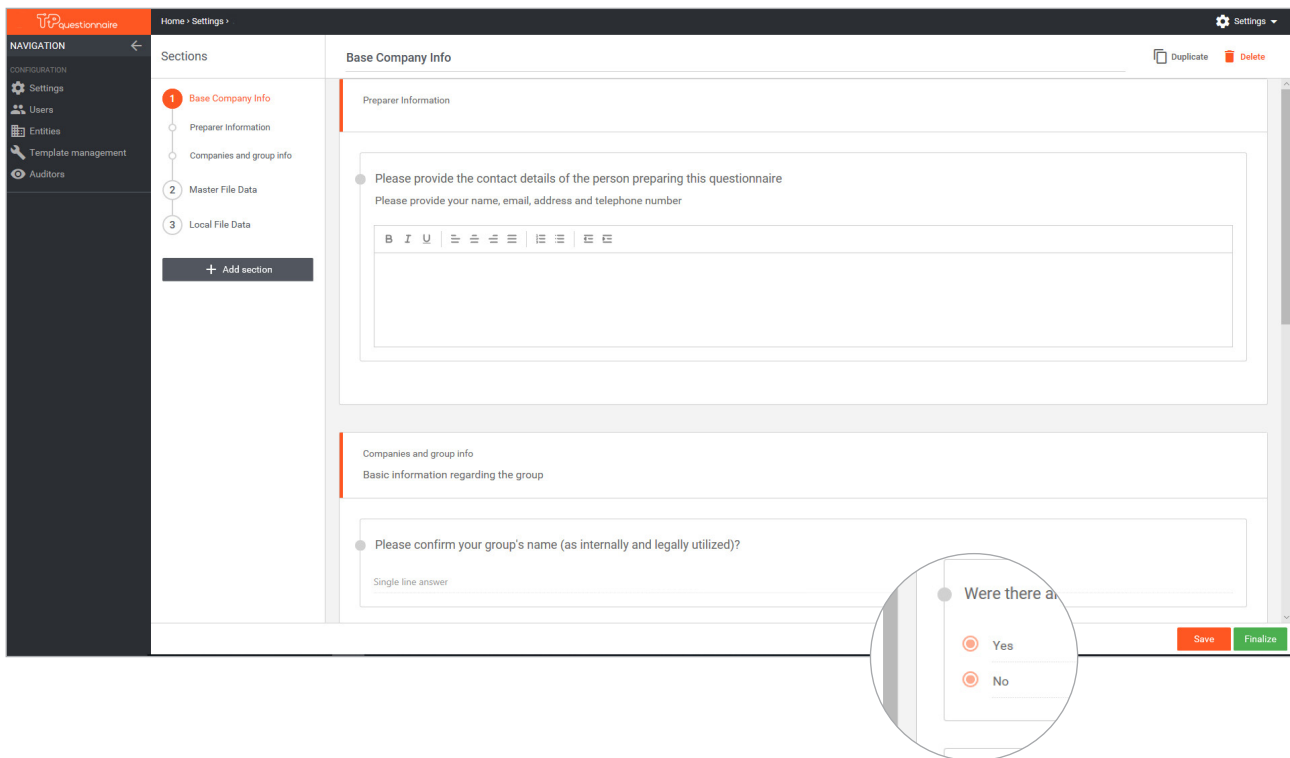

Tax Calender events

Why TPquestionnaire

TPquestionnaire allows administrators to send out questionnaires in an intuitive environment, providing the option to create different templates, view the status of outgoing questionnaires and manage your relations.

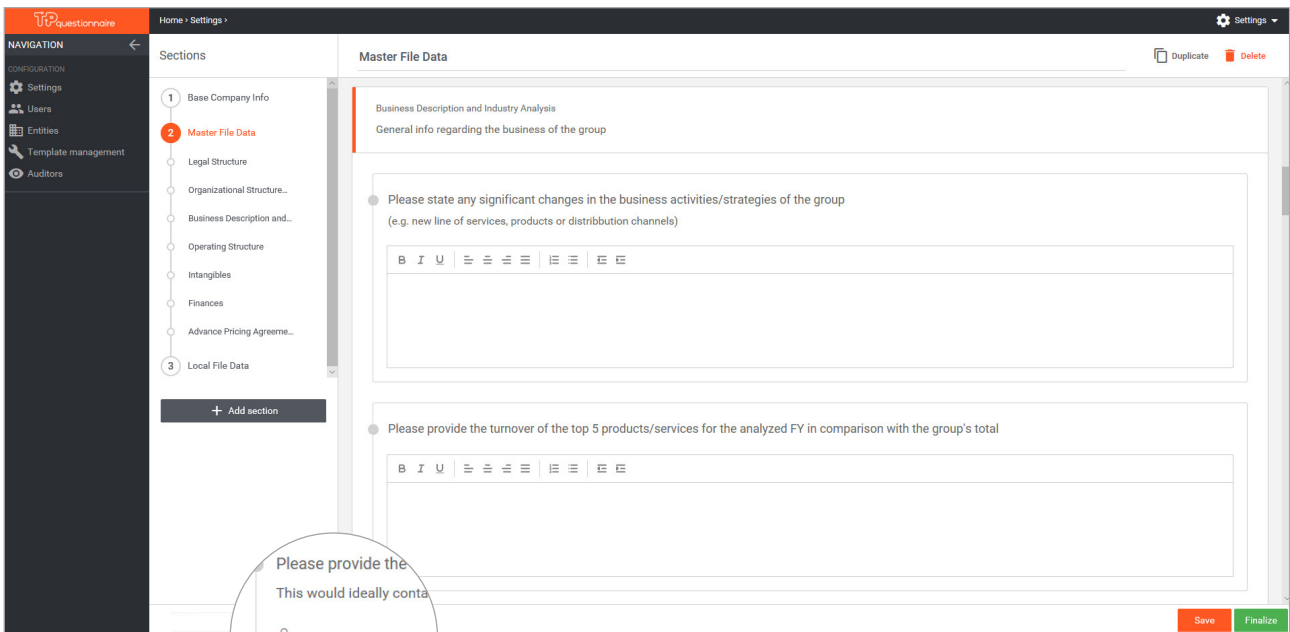

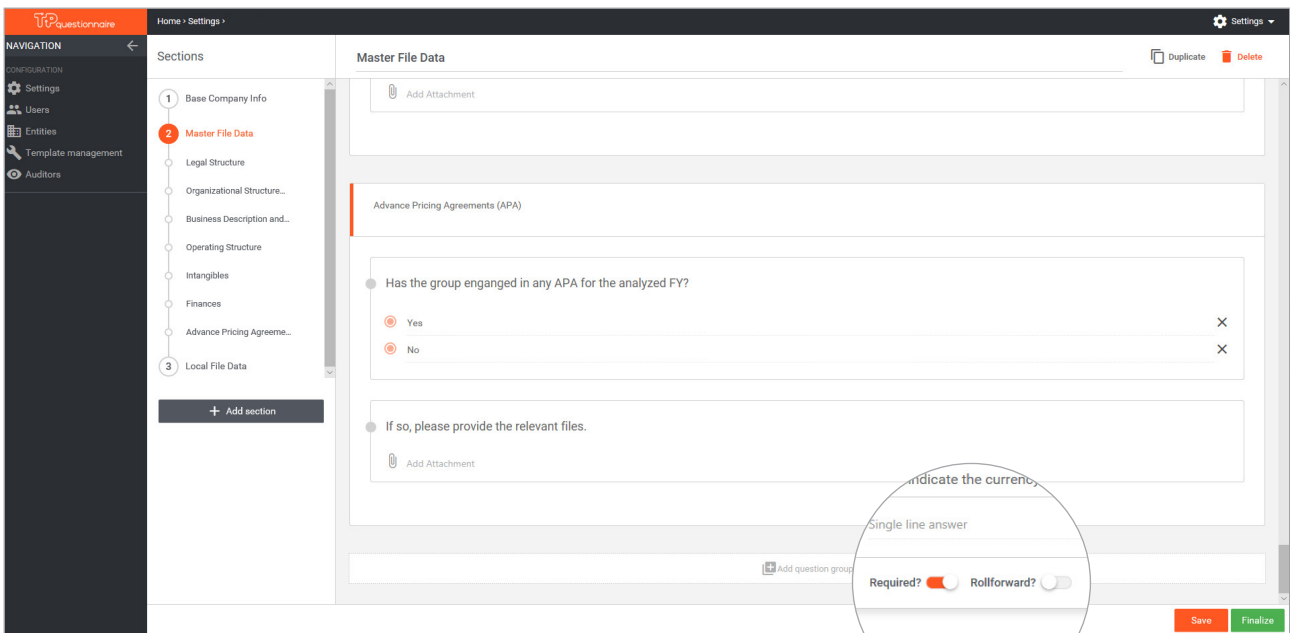

TPquestionnaire also facilitates users to fill in forms in a self-explanatory way, while offering advanced questionnaire functionalities such as Rich Text Editors, roll-forwarding, leaving comments and uploading files such as documentation or spreadsheets. Completed questionnaires can also be converted to a printable format, for easier reviewing or manual filling.

Integration with TPframework

TPquestionnaire is built to be used in combination with TPdoc but can also be modified to be used in combination with other TPframework solutions or TaxReporting solutions.

Besides these functionalities TPquestionnaire boasts a wide array of features such as support for multiple languages, Country & Currency Control and many more.
