

TAXSUITE SOFTWARE SOLUTIONS

Solutions in the market today

TaxModel is all about finding and building new technologies to reinvent the tax profession and reshape how business is conducted. The tax profession really needs to learn how to provide service around technology and understand that client needs are around having a solid tax control framework as part of having a strong overall business control framework. TaxModel's contribution is to build attractive technology at affordable prices that enables any multinational to actually operate a solid tax control framework.

TaxModel continuously embeds its in-house tax expertise into software. Each solution TaxModel releases to market is developed based on the highest technology standards, beautifully designed and aims to provide an affordable way to make tax workflows transparent and manageable for all companies. TaxModel wants its customers to get to a "due diligence readiness" level and to gain full control over their tax position. TaxModel solutions can be offered as a complete package (TaxSuite), a selection or as a standalone module depending on needs and budget, all based on the same platform.

Solutions in the market today

TAXPROOF

Web-enabled tax accounting solution, developed for anyone exposed to tax and accounting. TaxProof is an affordable solution for easing tax accounting work flows for all companies ranging from small to large cap.

TAXMANAGEMENT

Dashboard and graphical interface application, enabling the user to easily share and present data from the TaxModel Software Suite. This interface solution facilitates easy overviews, noticing trends, offering insights and quick decision making and taking.

TAXQUESTIONNAIRE

Software application that can be used for multiple purposes, e.g. processing transfer pricing interviews or gathering data for year-end reporting and due diligence data requests.

TAXFORECAST

Tool that enables users to make well-founded tax forecasts, including building "what-if" scenarios. When TaxForecast is combined with the rest of the TaxModel Software Suite, it offers a solid basis for your tax data management, in terms of current income tax actuals, and also future estimates.

TAXBENCHMARK

Replaces the majority of the current manual benchmarking efforts strongly reducing the costs of benchmark studies with a major improvement in speed, quality combined with full audit trail. TaxBenchmark can import the search output (comparables) from company databases, performs standardized industry and web checks, translates, audit trails and accelerate the review process.

TAXCBC

Country-by-Country Reporting tool web enabled application and is fully compliant with the OECD / G20 Base Erosion and Profit Shifting ("BEPS") CbC requirements as described in the final report of Action 13 (Transfer Pricing Documentation and Country-by-Country Reporting).
